 - Refer to the premium bonus flyer (28696Y) for details
- MNL Guarantee Pro®, multi-year guarantee annuity, rates increase (3, 5, and 7)
- MNL Accelerator® 5 fixed index annuity, fixed account rate increases

1. Premium bonus and enhanced premium bonus may vary by annuity product, premium band and surrender charge period selected and may be subject to a premium bonus and enhanced premium bonus recapture. Products that have premium bonuses may offer lower credited interest rates, lower index cap rates, lower participation rates and/or greater index margins than products that don't offer a premium bonus. Over time and under certain scenarios the amount of the premium bonus and enhanced premium bonus may be offset by the lower credited interest rates, lower index cap rates, lower participation rates and/or greater index margins. The premium bonus and enhanced premium bonus are not recaptured in the event of death of the annuitant. No premium bonus or enhanced premium bonus recapture will occur on any penalty-free withdrawal amount under the nursing home confinement waiver or on any rider charge.

2. Rider cost is 0.95% of accumulation value at each contract anniversary during the surrender charge period. Rider charge may vary by state.

1. The declared fixed rate is an annual effective rate. Interest is credited daily.

2. Strategy charge: Known as a strategy fee annual percentage in the contract. In exchange for the charge, an enhanced participation rate is received. The charge is multiplied by the number of years in the crediting term and is deducted once each term from the accumulated value allocated to the enhanced participation rate method. The charge will be deducted once each term at the earliest of any partial withdrawal that exceeds the penalty-free amount, a full surrender or the end of the term. The strategy charge will be deducted regardless of the interest credited to the contract and can lead to loss of premium in certain scenarios.

The MNL Accelerate® 5 is issued on base contract form ICC19-AS201A/AS201A/AS202A or appropriate state variation including all applicable endorsements and riders by Midland National® Life Insurance Company, West Des Moines, IA. Product and features/options may not be available in all states or appropriate for all clients. Annual Inverse Performance Trigger (IPT declared rate)	S&P 500®	8.50%

1. The declared fixed rate is an annual effective rate. Interest is credited daily.

1. Strategy charge: Known as a strategy fee annual percentage in the contract. In exchange for the charge, an enhanced participation rate is received. The charge is multiplied by the number of years in the crediting term and is deducted once each term from the accumulated value allocated to the enhanced participation rate method. The charge will be deducted once each term at the earliest of any partial withdrawal that exceeds the penalty-free amount, a full surrender or the end of the term. The strategy charge will be deducted regardless of the interest credited to the contract and can lead to loss of premium in certain scenarios.

The MNL IncomeVantage® Pro is issued on base contract form AS201A/ICC19-AS201A or appropriate state variation including all applicable endorsements and riders by Midland National Life Insurance Company, West Des Moines, IA. New business guidelines

Interest rates and interest credit factors ("rates") can change after we receive applications and before we receive the premiums. In order to qualify for a rate hold, the following must occur:

Fixed index annuities (FIAs), except those listed below	Must receive premium within 45 days of application received date.	Rate will be based on more favorable rates between*: <ul style="list-style-type: none">• application received date• premium received date
MNL Accelerate® fixed index annuity	Must receive signed application within 10 days AND must receive premium within 60 days of application signed date.	Rate will be based on application signed date

If the 45th or 60th day falls on a weekend or holiday, the premium must be received on the business day before the weekend or holiday.

*Rate hold only applies for the first contract year/or crediting period. For FIAs, in **subsequent contract years**, rates will be declared on the contract anniversary and will align with the effective date of the contract.

Disclosures

Fixed index annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. Although fixed index annuities guarantee no loss of premium due to market downturns, deductions from the accumulation value for optional benefit riders or strategy fees or charges associated with allocations to enhanced crediting methods could exceed interest credited to the accumulation value, which would result in loss of premium. They may not be appropriate for all clients. Interest credits to a fixed index annuity will not mirror the actual performance of the relevant index. **Premium bonus:** Premium bonus, ABR premium bonus, and Enhanced premium bonus may vary by annuity product, premium band and surrender charge period selected and may be subject to a premium bonus, (ABR) premium bonus, and enhanced premium bonus recapture. Products that have premium bonuses may offer lower credited interest rates, lower index cap rates, lower participation rates and/or greater index margins than products that don't offer a premium bonus. Over time and under certain scenarios the amount of the premium bonus, ABR premium bonus, and enhanced premium bonus may be offset by the lower credited interest rates, lower index cap rates, lower participation rates and/or greater index margins.

Surrender charge: A surrender during the surrender charge period could result in a loss of premium. Surrender charge structure may vary by state.

*GLWB: GLWB Bonus and GLWB stacking roll-up credit are not applied to the accumulation value, only to the GLWB Value, which is used to determine the lifetime payment amount. The GLWB value is not available for withdrawal, surrender or as a death benefit. There is no GLWB stacking roll-up credit in years when a withdrawal is taken or lifetime income payments have been elected. GLWB stacking roll-up credit is available if a required minimum distribution (RMD) is required.

Index accounts: Crediting methods such as index cap rates, participation rates, and index margins apply to index accounts only; not to the fixed account. Crediting methods and indexes are not available on all products or in all states.
