Fee Table

The following table describes the fees and expenses that may be incurred, directly or indirectly, when you, as a variable product owner, buy and hold interests in a separate account that invests in shares of the fund. The table does not include any fees or other expenses of any variable annuity or variable life insurance product; if it did, overall fees and expenses would be higher.

This example does not include any fees or other expenses of any variable annuity or variable life insurance product; if it did, overall expenses would be higher. For every \$10,000 invested, here's how much you, as a variable product owner, would pay in total expenses if all interests in a separate account that invests in shares of the fund were redeemed at the end of each time period indicated:

	Initial Class	Service Class	Service Class 2
1 year	\$ 26	\$ 36	\$ 51
3 years	\$ 80	\$ 113	\$ 160
5 years	\$ 141	\$ 197	\$ 280
10 years	\$ 318	\$ 443	\$ 628

In addition, the fund normally invests at least 80% of its assets in U.S. Government securities and repurchase agreements for those securities.

Principal Investment Risks

- **Interest Rate Changes.** Interest rate increases can cause the price of a money market security to decrease.
- **Issuer-Specific Changes.** A decline in the credit quality of an issuer or a provider of credit support or a maturity-shortening structure for a security can cause the price of a money market security to decrease.
