

LORD ABBETT®

SUMMARY PROSPECTUS

Lord Abbett Series Fund Mid Cap Stock Portfolio

MAY 1, 2019

CLASS/TICKER

CLASS VC NO TICKER

Before you invest, you may want to review the Fund's prospectus and statement of additional information, which contain more information about the Fund and its risks. You can find the Fund's prospectus, statement of additional information and other information about the Fund at www.lordabbett.com/seriesfunds. You can also get this information at no cost by calling 888-522-2388 (Option #2) or by sending an email request to literature@lordabbett.com. The current prospectus and statement of additional information dated May 1, 2019, as may be supplemented from time to time, are incorporated by reference into this summary prospectus.

INVESTMENT OBJECTIVE

The Fund seeks capital appreciation through investments, primarily in equity securities, which are believed to be undervalued in the marketplace.

FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. The table does not reflect the fees and expenses of variable annuity contracts or variable life insurance policies (together, "Variable Contracts"). If such fees and expenses were reflected, expenses shown would be higher.

Annual Fund Operating Expenses <i>(Expenses that you pay each year as a percentage of the value of your investment)</i>	
Class	VC Shares
Management Fees	0.72%
Other Expenses	0.42%
Total Annual Fund Operating Expenses ⁽¹⁾	1.14%
⁽¹⁾ This amount has been updated from the fiscal year amount to reflect current fees and expenses.	

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The Example does not reflect Variable Contract expenses, fees, and charges. If these expenses, fees, and charges were included, your costs would be higher. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

Class	1 Year	3 Years	5 Years	10 Years
VC Shares	\$116	\$362	\$628	\$1,386

Portfolio Turnover. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in the annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 50% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

To pursue its objective, under normal conditions, the Fund will invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in equity securities of mid-sized companies. The Fund may invest up to 10% of its net assets in foreign companies, including emerging market companies and American Depositary Receipts (“ADRs”). The Fund defines foreign companies as those whose securities are traded primarily on non-U.S. securities exchanges. Because ADRs represent exposure to foreign companies, the Fund deems them to be foreign investments even though they trade on U.S.

exchanges. Foreign securities may be denominated in the U.S. dollar or other currencies. The Fund's principal investments include the following types of securities and other financial instruments:

- **Equity securities** of mid-sized companies. The Fund may invest in any security that represents equity ownership in a company. Equity securities in which the Fund may invest include common stocks, preferred stocks, equity interests in trusts (including real estate investment trusts ("REITs") and privately offered trusts), partnerships, joint ventures, limited liability companies and vehicles with similar legal structures, and other instruments with similar economic characteristics. The Fund considers equity securities to include warrants, rights offerings, convertible securities, and other investments that are convertible or exercisable into the equity securities described above.
- **Mid-sized companies** having a market capitalization at the time of purchase that falls within the market capitalization range of companies in the Russell Midcap® Index.
- **Value companies** that the Fund's portfolio management team believes to be undervalued according to certain financial measurements of intrinsic worth or business prospects and to have the potential for capital appreciation.

The Fund may sell a security when the Fund believes the security is less likely to benefit from the current market and economic environment, shows signs of deteriorating fundamentals, or has reached its valuation target, among other reasons. The Fund seeks to remain fully invested in accordance with its investment objective; however, in response to adverse economic, market or other unfavorable conditions, the Fund may invest its assets in a temporary defensive manner. The Fund may miss certain investment opportunities if defensive strategies are used and thus may not achieve its investment objective.

PRINCIPAL RISKS

As with any investment in a mutual fund, investing in the Fund involves risk, including the risk that you may receive little or no return on your investment. When you redeem your shares, they may be worth more or less than what you paid for them, which means that you may lose a portion or all of the money you invested in the Fund. The principal risks of investing in the Fund, which could adversely affect its performance, include:

- **Portfolio Management Risk:** If the strategies used and investments selected by the Fund's portfolio management team fail to produce the intended result, the Fund may suffer losses or underperform other funds with the same investment objective or strategies, even in a favorable market.

- **Market Risk:** The market values of securities will fluctuate, sometimes sharply and unpredictably, based on overall economic conditions, governmental actions or intervention, political developments and other factors. Prices of equity securities tend to rise and fall more dramatically than those of debt securities.
- **Equity Securities Risk:** Equity securities, as well as equity-like securities such as convertible debt securities, may experience significant volatility. Such securities may fall sharply in response to adverse events affecting overall markets, a particular industry or sector, or an individual company's financial condition.
- **Industry and Sector Risk:** Although the Fund does not employ an industry or sector focus, its exposure to specific industries or sectors will increase from time to time based on the portfolio management team's perception of investment opportunities. If the Fund overweights a single industry or sector relative to its benchmark index, the Fund will face an increased risk that the value of its portfolio will decrease because of events disproportionately affecting that industry or sector. Furthermore, investments in particular industries or sectors may be more volatile than the broader market as a whole.
- **Mid-Sized Company Risk:** Investments in mid-sized companies may involve greater risks than investments in larger, more established companies. As compared to larger companies, mid-sized companies may have limited management experience or depth, limited ability to generate or borrow capital needed for growth, and limited products or services, or operate in less established markets. Accordingly, mid-sized company securities tend to be more sensitive to changing economic, market, and industry conditions and tend to be more volatile and less liquid than equity securities of larger companies, especially over the short term. Mid-sized companies also may fall out of favor relative to larger companies in certain market cycles, causing the Fund to incur losses or underperform. The shares of mid-sized companies may be less well-known and trade less frequently and in more limited volume than those of larger, more established companies, which can adversely affect the pricing of these securities and the ability to sell these securities in the future.
- **Value Investing Risk:** The prices of value stocks may lag the stock market for long periods of time if the market fails to recognize the company's intrinsic worth. Value investing also is subject to the risk that a company judged to be undervalued may actually be appropriately priced or even overpriced.

- Foreign and Emerging Market Company Risk:** Investments in foreign companies and in U.S. companies with economic ties to foreign markets generally involve special risks that can increase the likelihood that the Fund will lose money. For example, as compared with companies organized and operated in the U.S., these companies may be more vulnerable to economic, political, and social instability and subject to less government supervision, lack of transparency, inadequate regulatory and accounting standards, and foreign taxes. In addition, the securities of foreign companies also may be subject to inadequate exchange control regulations, the imposition of economic sanctions or other government restrictions, higher transaction and other costs, reduced liquidity, and delays in settlement to the extent they are traded on non-U.S. exchanges or markets. Foreign company securities also include ADRs. ADRs may be less liquid than the underlying shares in their primary trading market. Foreign company securities also may subject the Fund's investments to changes in currency rates. Emerging market securities generally are more volatile than other foreign securities, and are subject to greater liquidity, regulatory, and political risks. Investments in emerging markets may be considered speculative and generally are riskier than investments in more developed markets because such markets tend to develop unevenly and may never fully develop. Emerging markets are more likely to experience hyperinflation and currency devaluations. Securities of emerging market companies may have far lower trading volumes and less liquidity than securities of issuers in developed markets. Companies with economic ties to emerging markets may be susceptible to the same risks as companies organized in emerging markets.
- Real Estate Risk:** An investment in a REIT generally is subject to the risks that impact the value of the underlying properties or mortgages of the REIT. These risks include loss to casualty or condemnation, and changes in supply and demand, interest rates, zoning laws, regulatory limitations on rents, property taxes, and operating expenses. Other factors that may adversely affect REITs include poor performance by management of the REIT, changes to the tax laws, or failure by the REIT to qualify for favorable tax treatment under the Internal Revenue Code of 1986, as amended (the "Code"), and changes in local, regional, or general economic conditions.
- Liquidity/Redemption Risk:** The Fund may lose money when selling securities at inopportune times to fulfill shareholder redemption requests. The risk of loss may increase depending on the size and frequency of redemption requests, whether the redemption requests occur in times of overall market turmoil or declining prices, and whether the securities the Fund intends to sell have decreased in value or are illiquid.

An investment in the Fund is not a deposit of any bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. For more information on the principal risks of the Fund, please see the “More Information About the Fund – Principal Risks” section in the prospectus.

PERFORMANCE

The bar chart and table below provide some indication of the risks of investing in the Fund by illustrating the variability of the Fund’s returns. Each assumes reinvestment of dividends and distributions. The Fund’s past performance is not necessarily an indication of how the Fund will perform in the future.

The bar chart shows changes in the performance of the Fund’s Class VC shares from calendar year to calendar year. This chart does not reflect the sales charges or other expenses of Variable Contracts. If those sales charges and expenses were reflected, returns would be lower.

The table below shows how the Fund’s average annual total returns compare to the returns of securities market indices with investment characteristics similar to those of the Fund.

Average Annual Total Returns (for the periods ended December 31, 2018)			
Class	1 Year	5 Years	10 Years
Class VC Shares	-15.04%	2.54%	9.94%
Index			
Russell Midcap® Value Index <i>(reflects no deduction for fees, expenses, or taxes)</i>	-12.29%	5.44%	13.03%
S&P MidCap 400® Value Index <i>(reflects no deduction for fees, expenses, or taxes)</i>	-11.88%	5.56%	12.82%

MANAGEMENT

Investment Adviser. The Fund’s investment adviser is Lord, Abbett & Co. LLC (“Lord Abbett”).

Portfolio Managers.

Portfolio Manager/Title	Member of the Portfolio Management Team Since
Eli Rabinowich, Portfolio Manager	2018
Jeff D. Diamond, Portfolio Manager	2008
So Young Lee, Portfolio Manager	2018

PURCHASE AND SALE OF FUND SHARES

Because the Fund serves as an underlying investment vehicle for Variable Contracts, Fund shares currently are available only to certain insurance company separate accounts at net asset value (“NAV”).

TAX INFORMATION

For information about the federal income tax treatment of Fund distributions to the insurance company separate accounts that hold shares in the Fund, please refer to the prospectus provided by the insurance company for your Variable Contract. Because of the unique tax status of Variable Contracts, you should consult your tax adviser regarding treatment under the federal, state, and local tax rules that apply to you.

PAYMENTS TO INSURANCE COMPANIES AND OTHER FINANCIAL INTERMEDIARIES

The Fund and its related companies may make payments to the sponsoring insurance company, its affiliates, or other financial intermediaries for distribution and/or other services. These payments may create a conflict of interest by influencing the insurance company or other financial intermediary to recommend the Fund over another investment. Ask your individual financial professional or visit your insurance company's or financial intermediary's website for more information.
