Introducing the Fidelity Multifactor Yield Index 5% ER

Designed to deliver more consistent performance in various market conditions.

Growth potential

Market fluctuations seem to be the only constant these days. And you may be searching for new ways to help manage this volatility, while also growing your assets for retirement.

One option is to harness the power of factors with the Fidelity Multifactor Yield Index 5% ER.

This rules-based index blends six equity factor indices with U.S. Treasuries and cash, using a dynamic allocation approach that seeks to reduce volatility to deliver more consistent returns over time.

Midland National has licensed the Fidelity Multifactor Yield Index 5% ER for exclusive use on select fixed index annuity products.

Expertise

With 50+ years of quantitative investment experience, factor investing is a meaningful component of Fidelity's capabilities.

The team

1965: First dedicated quantitative analyst joins Fidelity

1992: Fixed Income Quantitative Team formed

1998: Money Market Quantitative Team formed

2006: Equity Quantitative Team established to complement Fidelity's fundamental capabilities

Capabilities and strategies

1988: First quantitative fund launched

2005: First proprietary fixed income multifactor risk model launched

2007: First equity multifactor global models launched

2016: Launched first domestic equity factor indices and exchanged-traded funds (ETFs)

2017: Launched Fidelity Bitcoin Index, our first digital asset index

2018: Launched first international equity and fixed income factor indices and ETFs

2021: Fidelity builds first thematic indices for its new suite of ETFs

What is a factor?

A factor is a characteristic of a security that helps explain its risk and return behaviors. And when key factors are combined, they have the potential to outperform the broader market and lower overall risk.

Research team	Tools and resources	Factor-based strategies
<ul style="list-style-type: none"> • Over 100 quantitative investment professionals across equity, fixed income, and asset allocation • 50+ years of quantitative investment experience at Fidelity 	<ul style="list-style-type: none"> • 3,000+ equity and fixed income characteristics in the research library <ul style="list-style-type: none"> • Style factors • Macro factors • Custom, proprietary risk-management tools 	<ul style="list-style-type: none"> • 13 Equity ETFs* and 2 Fixed Income ETFs with \$4.0B in assets under management • Over 60 proprietary factor indexes with indexes supporting ETFs and mutual funds • Single factor and multifactor active investment capabilities with \$4.6B across retail and institutional assets • 9 dedicated factor funds within managed accounts with \$38.1B in assets under management

Diversification

Certain factors have tended to perform well in varying market environments and no one factor outperforms all the time, so combining factors may provide diversification benefits.

Combination of six key factors

Supported by years of academic research and empirical data, six equity factor indices were combined to create the Fidelity Multifactor Yield Index 5% ER. Each factor and weighting was chosen with the goal of enhancing returns, managing risk, and targeting specific outcomes.

Factors within the Fidelity Multifactor Yield Index 5% ER

	Value	Momentum	Dividend yield	Quality	Low volatility	Size
What it is	Securities that are inexpensive relative to fundamentals	Positively trending securities	Securities that pay higher dividends	Financially healthy companies	Lower-risk securities	Smaller, potentially more agile companies
Underlying index name	Fidelity U.S. Value Factor Index SM (FIDUSVLT)	Fidelity U.S. Momentum Factor Index SM (FIDUSMOT)	Fidelity High Dividend Index SM (FIDUSCDT)	Fidelity U.S. Quality Factor Index SM (FIDUSQLT)	Fidelity U.S. Low Volatility Factor Index SM (FIDUSLVT)	Fidelity Small-Mid Factor Index SM (FIDUSSMT)

Factors can provide diversification

Factors have been shown to enhance portfolios over time, but no single factor works all the time. Since factors are not highly correlated with each other, they may perform differently in varying environments, which could allow consumers to benefit from diversification.

Hypothetical annual returns of factor strategies versus the broader market - 2002–2021

Source: Fidelity Investments as of 12/31/2021.

The performance shown does not represent any Fidelity strategy or client account and is no indication of any future performance of any such products or accounts.

Past performance is not guarantee of future results. Methodology: All factor portfolio returns shown are equal-weighted and sector neutral. Factor portfolios and indexes assume the reinvestment of dividends and exclude fees and other implementation costs. Russell 1000 Index is equal-weighted. Size (small cap) returns are annualized returns of the equal-weighted bottom quintile (by market capitalization) of the Russell 1000 Index. Value composite returns shown are annualized returns of a combined average ranking of stocks in the equal-weighted top quintile (by book/price ratio) and stocks in the top quintile (by earnings yield) of the Russell 1000 Index. Momentum returns are annualized returns of the equal weighted top quintile (by trailing 12-month returns) of the Russell 1000 Index. Quality returns are annualized returns of the equal-weighted top quintile (by return on equity) of the Russell 1000 Index. Return on equity is a measure of profitability that calculates how many dollars of profit a company generates with each dollar of shareholder's equity. Low-volatility returns are annualized returns of the equal-weighted bottom quintile (by standard deviation of weekly price returns) of the Russell 1000 Index. Standard deviation is a measure of return dispersion. A portfolio with a lower standard deviation exhibits less return volatility. Dividend yield returns are annualized returns of the equal-weighted top quintile (by dividend yield) of the Russell 1000 Index.

Diversification does not ensure a profit or guarantee against a loss.

Weighted to enhance income potential

A portfolio of six equity factors weighted with a tilt toward dividend yield may produce higher returns than an equally weighted portfolio, while still providing the benefits of diversification with exposure to the other factors.

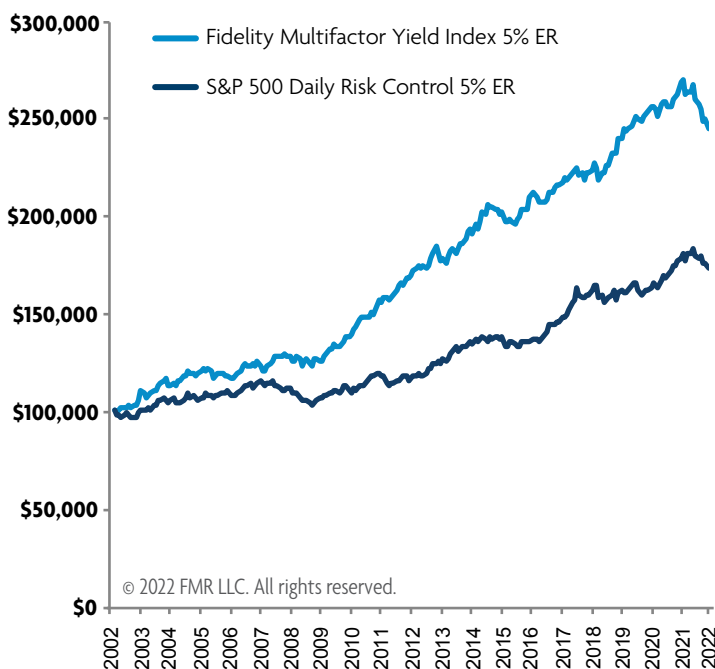

The Fidelity Multifactor Yield 5% ER works to optimize income potential by applying fixed weights to six Fidelity factor indices.

Fidelity Multifactor Yield Index 5% ER Index inception was 12/11/19. Returns of the Fidelity Multifactor Yield Index 5% ER prior to inception represent hypothetical pre-inception index performance (PIP), and returns for time frames after this date reflect actual index performance. PIP is based on criteria applied retroactively with the benefit of hindsight and knowledge of factors that may have positively affected performance. Actual performance of the index may vary significantly from PIP data. The level of the Fidelity Multifactor Yield Index 5% ER is calculated on an excess return basis (net of a notional financing cost) and reflects the daily deduction of a fee of 0.50% per annum. The fee is not related to the annuity. The hypothetical performance information presented herein does not reflect fees and expenses that an investor would pay in a fixed index annuity. It is not possible to invest directly in an index. All market indices are unmanaged. Not intended to represent the performance of any fixed index annuity.

The Fidelity Multifactor Yield Index 5% ER has been in existence since December 11, 2019. Performance figures prior to inception were determined by Fidelity Investments or its affiliates using the same methodology as used currently.

Consistency

Volatility control in addition to the combination of factors may achieve performance consistency in various market conditions.

Targets a specific volatility

The Fidelity Multifactor Yield Index 5% ER applies a fixed income overlay to help achieve a 5% volatility target. To manage to this target, it allocates between 10-year treasury futures and cash based on the performance trend in the prior three months, and adjusts allocations daily.

When performance trend is
positive

When performance trend is
negative

© 2022 FMR LLC. All rights reserved.

This volatility control mechanism, along with the combination of factors, can help the Multifactor Yield Index 5% ER achieve performance consistency in various market conditions.

Sammons Financial® is the marketing name for Sammons® Financial Group, Inc.'s member companies, including Midland National® Life Insurance Company. Annuities and life insurance are issued by, and product guarantees are solely the responsibility of, Midland National Life Insurance Company.

A.M. Best is a large, third-party independent reporting and rating company that rates an insurance company on the basis of the company's financial strength, operating performance, and ability to meet its obligations to policyholders. S&P Global Ratings is an independent, third-party rating firm that rates on the basis of financial strength. Ratings shown reflect the opinions of the rating agencies and are not implied warranties of the company's ability to meet its financial obligations. The ratings above apply to Midland National's financial strength and claims-paying ability. **A)** A.M. Best rating affirmed on July 29, 2022. For the latest rating, access ambest.com. **B)** Awarded to Midland National® as part of Sammons® Financial Group Inc., which consists of Midland National® Life Insurance Company and North American Company for Life and Health Insurance®. **C)** S&P Global rating assigned Feb. 26, 2009 and affirmed on May 25, 2022. **D)** Fitch Ratings, a global leader in financial information services and credit ratings, on Dec. 14, 2021, assigned an Insurer Financial Strength rating of A+ Stable for Midland National. This rating is the fifth highest of 19 possible rating categories. The rating reflects the organization's strong business profile, low financial leverage, very strong statutory capitalization, and strong operating profitability supported by strong investment performance. For more information access fitchratings.com.

The term financial professional is not intended to imply engagement in an advisory business in which compensation is not related to sales. Financial professionals that are insurance licensed will be paid a commission on the sale of an insurance product.

Fixed index annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. Although fixed index annuities guarantee no loss of premium due to market downturns, deductions from your accumulation value for additional optional benefit riders or strategy fees associated with allocations to enhanced crediting methods could exceed interest credited to the accumulation value, which would result in loss of premium. They may not be appropriate for all clients. Interest credits to a fixed index annuity will not mirror the actual performance of the relevant index.

The Fidelity Multifactor Yield IndexSM 5% ER (the "Index") is a multi-asset index, offering exposure to companies with attractive valuations, high quality profiles, positive momentum signals, lower volatility and higher dividend yield than the broader market, as well as U.S. treasuries, which may reduce volatility over time. Fidelity and its related marks are service marks of FMR LLC. Fidelity Product Services LLC ("FPS") has licensed this index for use for certain purposes to Midland National® Life Insurance Company (the "Company") on behalf of the Product. The Index is the exclusive property of FPS and is made and compiled without regard to the needs, including, but not limited to, the suitability needs, of the Company, the Product, or owners of the Product. The Product is not sold, sponsored, endorsed or promoted by FPS or any other party involved in, or related to, making or compiling the Index. The Company exercises sole discretion in determining whether and how the Product will be linked to the value of the Index. FPS does not provide investment advice to owners of the Product, nor to any other person or entity with respect to the Index and in no event shall any Product contract owner be deemed to be a client of FPS.

Neither FPS nor any other party involved in, or related to, making or compiling the Index has any obligation to continue to provide the Index to the Company with respect to the Product. Neither FPS nor any other party involved in, or related to, making or compiling the Index makes any representation regarding the Index, Index information, performance, annuities generally or the Product particularly.

Index methodology: Fidelity Multifactor Yield Index 5% ER Index inception was 12/11/19. Returns of the Fidelity Multifactor Yield Index 5% ER prior to inception represent hypothetical pre-inception index performance (PIP), and returns for time frames after this date reflect actual index performance. PIP is based on criteria applied retroactively with the benefit of hindsight and knowledge of factors that may have positively affected performance. Actual performance of the index may vary significantly from PIP data. The level of the Fidelity Multifactor Yield Index 5% ER is calculated on an excess return basis (net of a notional financing cost) and reflects the daily deduction of a fee of 0.50% per annum. The fee is not related to the annuity. The hypothetical performance information presented herein does not reflect fees and expenses that an investor would pay in a fixed index annuity. It is not possible to invest directly in an index. All market indices are unmanaged. Not intended to represent the performance of any fixed index annuity.

The Fidelity Multifactor Yield Index 5% ER is just one of the many index options available through Midland National. To learn more about Midland National products, contact your financial professional.

Midland National® is a Sammons Financial Group company.

We are committed to our customers, distribution partners, employees and communities – and the deeply rooted belief that we grow stronger together.

With so much change happening in the world, people are looking for companies that can stand the test of time. They need a partner that can weather life's storms. That's us. For over a century, we have been here for our customers and honoring our commitments. And because we're privately owned, we don't measure our impact by the number of years we've been in business, investor goals or size of the company. We are proud of our impact of the financial futures we help secure, and the legacies we help establish.

We believe that we aren't here to serve just today's customers, but customers for generations to come. As we look ahead to our next hundred years, that fundamental principle remains rich in its vision. No matter how much change happens in the world around us, we strive to find new ways to create value for our customers.

Just like always.

Midland National has continued to earn high ratings, based on our financial strength, operating performance, and ability to meet obligations to our policyholders and contract holders. Midland National currently holds the following ratings:

“A+”

A.M. Best^{A,B} (Superior) (Second category of 15)

S&P Global Ratings^{B,C} (Strong) (Fifth category of 22)

Fitch Ratings^D (Stable) (Fifth category of 19)
