Under an endorsement split dollar arrangement, the value of the life insurance afforded the employee is taxable to the employee. The employer should provide the employee with tax reporting based on requirements specified in the tax code. The parties to the endorsement split dollar arrangement should seek their own independent legal and tax advice as to whether and how to enter into an endorsement split dollar arrangement based on the employee's unique circumstances.

Under an endorsement split dollar arrangement, the employee enters into an agreement with their employer. Midland National is not a party to this agreement and Midland National's only obligation is to administer the policy it issues consistent with the policy's terms and conditions.

To ensure the death benefit proceeds of any employer-owned policy retains its tax-favored treatment, it is essential to comply with the notice and consent requirements of IRC Section 101(j).
