

Nationwide® and Midland National Partner to Distribute Commission-Free Indexed Annuity

Midland National Capital Income® fixed indexed annuity will be sold as part of Nationwide's portfolio of advisory annuity solutions

COLUMBUS, Ohio – As more Americans than ever before reach retirement age, two of the nation's most stable and secure financial services firms are teaming up to provide a retirement solution that provides guaranteed retirement income and extra protection for investors working with fee-based advisors.

[Nationwide](#), the top wholesale distributor of advisory variable annuities¹, will begin selling Midland National Capital Income, the top-ranked² fixed indexed annuity (FIA) for fee-only advisors, further enhancing the company's suite of advisory FIA options. Midland Advisory, part of Midland National® Life Insurance Company, will distribute the FIA alongside Nationwide, expanding their product offering beyond their current advisor network.

A competitive income solution specifically designed for advisory practices, Capital Income provides guaranteed lifetime income through a built-in Guaranteed Lifetime Withdrawal Benefit (GLWB) for an annual 1% charge. It also features an embedded ADL Benefit Rider, known as the health-activated income multiplier, which allows a client to double their annual lifetime payment for five years if they can no longer perform two of six listed "Activities of Daily Living," or ADLs.³

"As we enter a period of peak retirement, many pre-retirees are seeking out advisors and solutions to ensure they have the resources they need to secure peace of mind for their golden years," said Eric Fry, associate vice president of Nationwide Advisory product development. "Working together with Midland Advisory, Nationwide will now be able to offer another guaranteed product for advisors that will help them bridge the retirement gap for their clients."

Two factors that distinguish Capital Income from other advisory FIAs, said Fry, are that there is no waiting period to start income, as long as all payees meet the age requirements, and that the ADL benefit is available even after the account value is depleted. This creates greater flexibility and control for the advisor and their client.

"One of the biggest challenges in financial planning is bridging the transition from funding retirement to creating a solid decumulation strategy that both the advisor and client can trust. Advisors don't have as many options for client retirement income as they do for accumulation," said Cooper Sinclair, Head of Strategy for Midland Advisory at Midland National. "With Nationwide and Midland Advisory working together, we expect to bring annuity benefits to more financial advisors and their clients."

Midland Advisory, part of Midland National® Life Insurance Company, specializes in retirement solutions to help meet the needs of registered investment advisors (RIAs) and their clients.
